

Is Your Business Ready For Full Fibre?

A 30 SECOND CONNECTIVITY HEALTH CHECK

Slow internet isn't just frustrating - it's costing your business time, money and opportunities

1 HOW DOES YOUR CONNECTIVITY STACK UP?

- Video calls freeze or drop
- Multiple users slow everything down
- Uploading files takes too long
- Remote workers struggle
- Cloud apps lag or timeout
- VoIP calls are unreliable

2 OR MORE? YOUR CONNECTION COULD BE HOLDING YOUR BUSINESS BACK

2 THE HIDDEN COST OF SLOW CONNECTIVITY

- Lost productivity across teams
- Delays in responding to customers
- Missed opportunities and jobs
- Frustrated staff and poor experience

EVEN SMALL DELAYS, REPEATED DAILY, QUICKLY ADD UP

3 WHAT FULL FIBRE DELIVERS

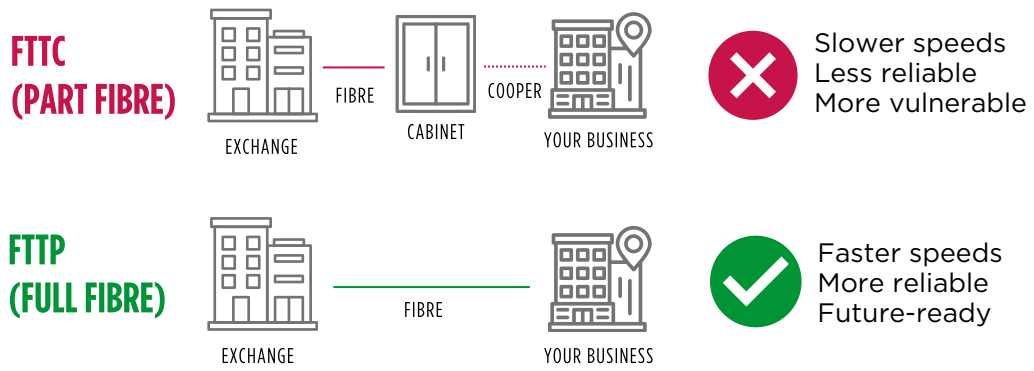

- CONSISTENT HIGH SPEEDS**
Even at peak times
- SEAMLESS CLOUD ACCESS**
No lag, no delays
- RELIABLE CALLS & COLLABORATION**
Crystal clear & dependable
- SCALES WITH YOUR BUSINESS**
Built for what's next
- STABLE & FUTURE-PROOF**
More reliable, more resilient

4 NOT ALL FIBRE IS THE SAME

Many businesses are still using part-fibre connections (like FTTC), which rely on copper for the final stretch - limiting speed and reliability.

Full fibre (FTTP) delivers a direct fibre connection to your premises - unlocking true performance.

5 THE DIFFERENCE IS CLEAR

6 WHY IT MATTERS

- Faster uploads & downloads
- Optimised for cloud apps & remote working
- Stronger, more reliable business operations
- A better experience for your team & customers

FIND OUT WHAT YOU CAN GET IN SECONDS

Don't guess - check your business location and see your fibre options instantly.
